An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Carol Gruppi on 23 January 2004.

The application has been amended as follows:

In the claims:

Claims 15-27 have been cancelled.

Northrop et al. (A) is cited as being of interest. See the paragraph bridging columns 4 and 5, and column 18, lines 30-51.

Applicant's election with traverse of Group I, claims 1-14, in the paper filed 6 November 2003, is acknowledged. The traversal is on the ground(s) that the additional search for the invention of Group II would not be unduly burdensome. This is not found persuasive because the practice of Group II, drawn to a method of using the elected invention, would necessitate the presence of a promoter region in the construct, which is mutually exclusive of the elected product, which lacks any such regulatory sequence. The size and scope of the search for Group II would have expanded considerably beyond that for the promoterless invention of Group I.

The requirement is still deemed proper and is therefore made FINAL.

The cancellation of the non-elected claims further renders moot the discussion of the restriction in this application.
